REBECCA NABUSAMBYA MANYASI

Diploma in Information Technology | Target Career: Cloud Security Architect

Nairobi, Kenya • 0116968755 • 2502692@students.kcau.ac.ke
Portfolio: becca-afk.github.io/portfolio • GitHub: github.com/becca-afk

PROFESSIONAL SUMMARY

Highly motivated IT Professional and Junior Achievers national runner-up with a strong academic track record (GPA 3.41) and a clear focus on cloud security architecture. Proven capability to engineer and deploy functional, real-world technical solutions, including a live client e-commerce platform integrated with automated WhatsApp order processing. Self-driven technical enthusiast with hands-on experience cultivating infrastructure, enterprise administration, and cloud skills within virtual test environments. Recognized for resilience, proactive problem-solving, and executing under high-pressure parameters. Seeking an entry-level IT Support, Networking, or Cloud Assistant role to deliver immediate operational value while advancing toward comprehensive cloud security specialization.

TECHNICAL SKILLS

Cloud & Labs	AWS Core Fundamentals (Cloud Practitioner in progress), VirtualBox, Linux environment basics
Windows Admin	Windows Server administration, Active Directory environment setup, User/Group provisioning, Group Policy Objects (GPOs), network drive mapping
Networking	TCP/IP foundations, routing protocols, logical subnetting, basic network segmentation
Programming	Java, HTML5, CSS3, core Data Structures & Algorithms, Git / GitHub version control, Vercel deployment pipelines
Systems Analysis	Systems Analysis & Design, Software Development Life Cycle (SDLC), Requirements Gathering, Unified Modeling Language (UML) structural modeling
Hardware & Tech	PC architecture assembly, RAM/storage diagnostic & component replacement, power supply unit testing, boot sequence troubleshooting

TECHNICAL PROJECTS

First Class Perfume — E-Commerce Web Application [Live App: first-class-perfume.vercel.app] **Nairobi, Kenya**

- Architected, developed, and deployed a fully responsive e-commerce web platform engineered for fluid multi-viewport performance.
- Resolved client operational friction by configuring custom WhatsApp and M-Pesa transaction routing, directly enabling live business orders and processing.
- Managed source code deployments and live production versions via continuous Git integration hosted on Vercel infrastructure.

Enterprise Active Directory Virtual Lab **Self-Directed**

- Deployed a sandboxed enterprise network domain controller utilizing Windows Server configurations inside Oracle VirtualBox.
- Implements foundational Identity and Access Management (IAM) controls including centralized user password resets, secure organizational unit provisioning, automated drive mapping, and customized Group Policy administrative constraints.
- Authored complete end-to-end deployment documentation and step-by-step security workflows published inside personal portfolio.

Responsive Vehicle Showcase Web Platform [Live App: becca-afk.github.io/car-website] **Nairobi, Kenya**

- Engineered a sleek, responsive vehicle showcase layout using semantic HTML5 and layout styling optimized for fast cross-device parsing.
- Structured accessible frontend directory configurations, utilizing GitHub Pages for seamless static asset deployment pipelines.

EDUCATION

Diploma in Information Technology **May 2025 – Present**

KCA University, Nairobi, Kenya | *Expected Completion: 2027*

- **Cumulative GPA:** 3.41 / 4.00 (Credit, B+ Equivalent performance across 16 units completed with a 100% pass rate).
- Demonstrated outstanding academic resilience, achieving top-tier terminal examination scores across core practical modules.
- ***Key Coursework Metrics:*** *Systems Analysis and Design (A-), Computer Organization and Architecture (A), Web Design and Development (A), Database Systems (A-), Introduction to Programming (B+), Computing Mathematics (B+), Data Structures and Algorithms (B), Fundamentals of Computer Networks (B).*

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **AWS Certified Cloud Practitioner:** Active self-study curriculum covering foundational cloud architecture frameworks, AWS core services, global infrastructure layout, and cloud pricing parameters.
- **CompTIA Security+:** Self-directed learning tracking foundational security operations, risk identification, threat mitigation vectors, and cryptography essentials.
- **AWS User Groups Kenya:** Engaged active member; participating in professional technical communities to keep updated with enterprise cloud security paradigms.
- **Crayel Technical Training Programme:** Earned formal Certificate of Participation upon completing specialized module workflows.

ACHIEVEMENTS & LEADERSHIP

- **Junior Achievers Kenya — 2nd Place Nationally (Runner-Up):** Selected to advance to national finals in Mombasa to represent innovative enterprise strategies. Demonstrated high-velocity analytical problem solving, group leadership, and concise corporate presentation workflows before an executive panel.
- **Academic Resilience Recognition:** Validated excellent subject comprehension under pressure, successfully balancing comprehensive self-guided practical projects alongside full-time institutional technical studies.
